## THE SMILE CORNER

### BRUSHING MISTAKES, WE SHOULD AVOID

Brushing teeth every day helps to maintain proper oral hygiene. Brushing the right way helps prevent cavities, gum diseases and bad breath.

RIGHT WAY TO BRUSH:

- Use a soft or medium tooth brush
- Brush gently in small circular motions or vertical motions
- Make sure you brush at least for 3 minutes and do not apply excessive force
- Make sure you cover all areas of the teeth and brush at least twice a day

COMMON MISTAKES and associated problems

- Brushing too hard and for longer duration leads to enamel wear and cause sensitivity.
- Brushing for less time causes improper removal of deposits which leads to tooth cavity.
- Horizontal brushing wears away the enamel and is not very effective in cleaning in between teeth.

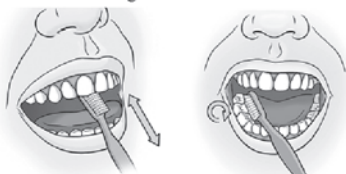

Fig-Proper brushing technique

Have a professional ultra sonic cleaning done with a dentist at least once a year as that will keep your gums healthy and will increase the life and health of your teeth.
